To Whom It May Concern

Dear Sirs,

Lucy Electric is a global leader in medium voltage, secondary power distribution solutions, specialising in high-performance medium voltage switchgear for utility, industrial and commercial applications. Our best-in-class products are at the cutting edge of medium voltage design and innovation, built to anticipate the evolving technical and market demands of our customers. We have over 100 years' industry experience grounded in British engineering excellence and an established international network with a local track record in over 50 countries.

This is a confirmation letter that Shadin Al Janoob Company has worked with Lucy Electric as a vendor via Technical Solutions to Industry FZE (TSI) where they supplied various medium voltage equipments to ENI Iraq and installed them at their oil fields located in Iraq (supply & Installation)

Best Regards,

Subject: Reference letter – Shadin AlJanoob / Zuhair Oudah

To whom it may concern;

This is to express our appreciation for the efforts of Zuhair Oudah and his company, Shadin AlJanoob. As owner and manager of Shadin, Mr. Oudah has played an integral part in the success of our Instrument, Electrical, and Telecom projects in the Zubair field.

Shadin's performance under Mr. Oudah's leadership should be a model for all local companies. Over the course of the past three years since the contract was awarded, Shadin's quality and performance of work has been very good and continues to improve. His company has never failed to perform for us and was most impressive in the ability to procure substation and power distribution equipment needed to execute a rush job to replace generators at wells. The degree of flexibility and dedication has made this project a big success.

Mr. Oudah has always been very cooperative and professional despite many difficulties and obstacles within the working environment. I would highly recommend Mr. Oudah and Shadin and hope to continue to work with him in the future.

Sincerely,

Power Engineering World for General Contracts Ltd.

To : Whom it may concern

Date: March 27, 2016
PEW Ref.: 27031601AMN

Subject: Shadin AL-Janoob Co. (SHJ)

Dear Sir,

We, Power Engineering World Co. (PEW), was selected by several clients in Power sectors and Oil & Gas sector as a contractor to construct power plant projects as in profile attached. PEW selected Shadin AL-Janoob co. (SHJ) to perform deferent activities as a sub-contractor for Installation of electro-mechanical systems & supply of construction works materials

We would like to highlight the fact that Shadin AL-Janoob (SHJ) management and staff worked with PEW as one team to complete the project in the best possible matter that satisfied the client. Projects was accomplished within the schedule and in accordance to specifications. One of the key factors for PEW to succeed in this important project was the support of SHJ throughout the project. SHJ is a hardworking and faithful sub-contractor and respects its obligations and works towards achieving them. PEW would like to recommend SHJ to work in large scale power and infra-structure projects.

Kindly contact me for any questions.

ACTIVITIES

Since its establishment, SHADIN has long term experience in many fields, based on executed & ongoing work activities as detailed below:

ELECTRICAL & INSTRUMENTATION FIELDS

- OHTL
- Electrical networks and power systems
- Low & High Switchgears
- Stationary and mobile Substations
- kiosk package Substation
- Motor control center Ac/Dc Motor
- Low & High voltage cabling
- UPS & DC charger system
- Solar System
- Automation System
- Scada System
- PLC & Monitoring System
- Fire & Gas PLC Monitoring System in normal and Hazard area (Zo,Z1...)
- Metering Skid
- Instrumentation System.(Meter, Flow, Radar, Actuators)
- PLC System for National, Grid & Generators
- Lighting controls (Lutron, Radio Ra, etc.)
- Installation Of HV Towers, Substations
- Supply & Installation of HV Network Lines & Accessories

(Installation of H.V system and Power maintenance)

MECHANICAL FIELDS

- Installation & Operation of Plants
- Installation of Different Types of Pipe-Line Systems
- Maintenance & Repair of Different Types of Diesel Generators
- Maintenance & Repair of Different Types of Pumps & Gear Boxes
- Iron & Steel Fabrication Works

CIVIL, CONSTRUCTION & CONCRETE INDUSTRY

- Construction & Building of Schools, hospitals and governmental premises
- Rehabilitation of Buildings
- Civil, Architectural & Decoration Design
- Supply of Different Types of Construction Materials such as Gravel, Sand, Cement, Bricks, Concrete Blocks, Iron Bars, Marble, Limestone, Gypsum, Tiles, Ceramics, ... etc.
- Concrete Blocks, Slabs and Structures
-

(Steel structure & concrete foundation)

Equipment and material supply

- Power Plants & Generators
- Power 132/33/11 MKV Mobile substations
- Low & High transmission lines
- Low & High Switchgears
- 132/33/11 KV Substations Network
- Substation kiosk package
- Motor control center Ac/Dc Motor
- Low & High voltage cabling
- UPS & DC charger system
- Solar System
- Power Cables
- Control and F.O cables
- Resident Network
- Automation System
- Scada System

Shadin Al-Janoob for General Contracting and Trading Ltd.
Al Jazer, Rear Street
Basra, Iraq

Basrah, 27 March 2013

FORM OF AGREEMENT

CONTRACT No: 5000001915

Subject: "Electrical / Instrumentation and Telecom Construction Activities"

THIS CONTRACT IS MADE BY AND BETWEEN:

Eni Iraq B.V. a company existing under the laws of The Netherlands, and having its principle place of business at: WTC - Tower B, Strevenslaan 1775, 1077 XX Amsterdam, The Netherlands (Herein after called COMPANY);

CONTRACTOR:

Shadin Al-Janoob for General Contracting and Trading Ltd., a company incorporated in Iraq and having its principal place of business at Al Jazer, Rear Street, Basra, Iraq and registered with Iraq Ministry of Finance with Taxpayer Identification Number (TIN) 500237266 (Hereinafter called CONTRACTOR).

COMPANY and CONTRACTOR are hereinafter individually referred to as "PARTY" or collectively referred to as the "PARTIES", as the context requires.

Whereas:

- COMPANY is engaged in petroleum operations in the Republic of Iraq for and on behalf of its PARTNERS and requires WORKS to be provided by CONTRACTOR;
- CONTRACTOR represents that it is fully experienced, qualified, able and willing to provide the WORKS in accordance with the CONTRACT;
- The PARTIES have negotiated in good faith and have reached an agreement on the terms of the CONTRACT.

Therefore, in consideration of the premises herein above which constitute an integral part of this FORM OF AGREEMENT,

eni iraq bw

WTC - Tower H
Stationsplein 1720
1017 XX Amsterdam
The Netherlands

Tel: +31 20 570 7100
Fax: +31 20 570 7170

COMPANY and CONTRACTOR agree as follows:

1. SCOPE OF CONTRACT

The CONTRACT covers the provision of WORKS by CONTRACTOR as further defined within Appendix "D" and in conformity in all respects with the provisions of the CONTRACT.

2. EFFECTIVE DATE, DURATION OF THE CONTRACT AND COMPLETION DATE

The CONTRACT is effective on the date stated here below (EFFECTIVE DATE) and shall remain in effect for a period of three (3) years.

The EFFECTIVE DATE is: date the CONTRACT is signed/countersigned by both parties.

3. CONTRACT DOCUMENTS

The following documents shall be deemed to form and be read and construed as part of this CONTRACT:

- 3.1 This FORM OF AGREEMENT;
- 3.2 General Conditions
- 3.3 Special Conditions
- 3.4 Appendix "A" - Compensation
- 3.5 Appendix "A1" - Price Lists
- 3.6 Appendix "C" - Bank Guarantee and Parent Company Guarantee
- 3.7 Appendix "D" - Scope of Work, Specifications, Drawings and Documents
- 3.8 Appendix "F" - HSE Requirements
- 3.9 Appendix "F" - Quality Requirements
- 3.10 Appendix "G" - Project Coordination Procedure
- 3.11 Appendix "H" - Contract Administration Procedure
- 3.12 Appendix "K" - Forms of Interim Certificates
- 3.13 Appendix "L" - Forms of Acceptance Certificates
- 3.14 Appendix "S" - Security
- 3.15 Appendix "T" - Shipping, Importation & Customs

Any conflict, discrepancy, inconsistency or ambiguity among any of the above documents shall be resolved by giving effect to the provisions of the CONTRACT together with all the related attachments as referred therein, in the order of precedence as they are listed hereinabove with the sole exception that the Special Conditions shall prevail over the General Terms and Conditions.

THIS FORM OF AGREEMENT and other CONTRACT documents may be provided, as circumstance may necessitate, in Arabic as well as English. In the case of any dispute between Arabic translation and English text of the CONTRACT, the prevailing language shall be English.

CONTRACTOR shall refer to COMPANY any conflict between the referenced CONTRACT documents prior to proceeding with the WORKS.

4. CONTRACT ADMINISTRATOR

The COMPANY unit in charge for the administration of the CONTRACT is Facilities Installation & Construction Department.

**eni iraq bw**WTC - Tower B
Strevensvash 1725
1077 XX Amsterdam
The NetherlandsTel: +31 20 570 7130
Fax: +31 20 570 7170**5. AMENDMENTS**

No change, amendment or other modification to this CONTRACT shall have any force or effect unless in writing and duly executed by both PARTIES.

6. COVENANTS FOR EXECUTION OF WORK AND PROVIDING OF WORK**6.1 CONTRACTOR**

In consideration of the payment to be made by COMPANY to CONTRACTOR as set out in this CONTRACT, CONTRACTOR hereby covenants with COMPANY to provide WORKS in a workmanlike and expeditious manner and in conformity in all respects with the provisions of this CONTRACT.

6.2 COMPANY

In consideration of CONTRACTOR's provision of WORKS and all its obligations under this CONTRACT, COMPANY hereby covenants to pay CONTRACTOR the compensation at the time(s) and in the manner prescribed by the CONTRACT.

7. WARRANTIES AS TO LEGAL CAPACITY

Each of the PARTIES warrants to the other that:

7.1 It is a corporation duly organised and validly existing under the laws of the Country of its incorporation;

7.2 It has the legal right, capacity, full power and authority and all necessary permits, licences etc., to carry on its business and to perform its obligations under the CONTRACT, to deliver and perform the CONTRACT and each matter contemplated by the CONTRACT or any document incorporated by reference into the CONTRACT;

7.3 The execution, delivery and performance by it of the CONTRACT and each matter contemplated by the CONTRACT, and any document incorporated by reference into the CONTRACT will not (with or without the lapse of time, the giving of notice or both) breach, contravene or conflict with:

7.3.1 any law, permit, license etc., that it requires or has obtained in relation to any such matter;

7.3.2 its constitution or constituent documents;

7.3.3 any security arrangement, deed, contract, undertaking or other instrument or any encumbrance to which it is a party or which is binding on it, and does not and will not result in the creation or imposition of any security over any of its or their assets there under;

7.3.4 Any of its obligations, including any statutory, contractual or fiduciary obligations.

8. SURVIVAL OF PROVISIONS

The provisions of this CONTRACT which by their nature survive final termination of the WORKS or of the CONTRACT and which are stated to survive shall remain in full force and effect after such termination for any cause whatsoever.

COMPANY and CONTRACTOR agree as follows:

1. SCOPE OF CONTRACT

The CONTRACT covers the provision of SERVICES by CONTRACTOR as further defined with n Appendix "D" and "A" and in conformity in all respects with the provisions of the CONTRACT.

2. EFFECTIVE DATE, DURATION OF THE CONTRACT AND COMPLETION DATE

The CONTRACT is effect ve on the date stated here below (EFFECTIVE DATE) and shall remain in effect for a period of 120 days from the COMMENCEMENT DATE.

The EFFECTIVE DATE is: 18th June, 2012

The COMMENCEMENT DATE is: 03th July, 2012

The COMPLETION DATE shall be: 02nd November 2012.

3. CONTRACT DOCUMENTS

The following documents shall be deemed to form and be read and construed as part of this CONTRACT:

- | | | |
|-----|------------------------|---|
| 3.1 | This FORM OF AGREEMENT | |
| 3.2 | General Conditions | |
| 3.3 | Special Conditions | |
| 3.4 | Appendix "A" | Compensation Schedule |
| 3.5 | Appendix "D" | Scope of Work, Specifications, Drawings and Documents |
| 3.6 | Appendix "E" | HSE Requirements |
| 3.7 | Appendix "F" | Quality Requirements |
| 3.8 | Appendix "S" | Security |

Any conflict, discrepancy, inconsistency or ambiguity among any of the above documents shall be resolved by giving effect to the provisions of the CONTRACT together with all the related attachments as referred therein, in the order of precedence as they are listed hereinabove with the sole exception that the Special Conditions shall prevail over the General Terms and Conditions.

This FORM OF AGREEMENT and other CONTRACT documents may be provided, as circumstance may necessitate, in Arabic as well as English. In the case of any dispute between Arabic translation and English text of the CONTRACT, the prevailing language shall be English.

CONTRACTOR shall refer to COMPANY any conflict between the referenced CONTRACT documents prior to proceeding with the SERVICES.

4. CONTRACT ADMINISTRATOR

The COMPANY unit in charge for the administration of the CONTRACT is Facilities Installation & Construction Department.

No change, amendment or other modification to this CONTRACT shall have any force or effect unless in writing and duly executed by both PARTIES.

6. COVENANTS FOR EXECUTION OF WORK AND PROVIDING OF SERVICE**6.1 CONTRACTOR**

In consideration of the payment to be made by COMPANY to CONTRACTOR as set out in this CONTRACT, CONTRACTOR hereby covenants with COMPANY to provide SERVICES in a workmanlike and expeditious manner and in conformity in all respects with the provisions of this CONTRACT.

6.2 COMPANY

In consideration of CONTRACTOR's provision of SERVICES and all its obligations under this CONTRACT, COMPANY hereby covenants to pay CONTRACTOR the compensation at the time(s) and in the manner prescribed by the CONTRACT.

7. WARRANTIES AS TO LEGAL CAPACITY

Each of the PARTIES warrants to the other that:

- 7.1 It is a corporation duly organised and validly existing under the laws of the Country of its incorporation;
- 7.2 It has the legal right, capacity, full power and authority and all necessary permits, licences etc., to carry on its business and to perform its obligations under the CONTRACT, to deliver and perform the CONTRACT and each matter contemplated by the CONTRACT or any document incorporated by reference into the CONTRACT;
- 7.3 The execution, delivery and performance by it of the CONTRACT and each matter contemplated by the CONTRACT, and any document incorporated by reference into the CONTRACT will not (with or without the lapse of time, the giving of notice or both) breach, contravene or conflict with:
 - 7.3.1 any law, permit, license etc., that it requires or has obtained in relation to any such matter;
 - 7.3.2 its constitution or constituent documents;
 - 7.3.3 any security arrangement, deed, contract, undertaking or other instrument or any encumbrance to which it is a party or which is binding on it, and does not and will not result in the creation or imposition of any security over any of its or their assets there under;
 - 7.3.4 Any of its obligations, including any statutory, contractual or fiduciary obligations.

8. SURVIVAL OF PROVISIONS

The provisions of this CONTRACT which by their nature survive final termination of the SERVICES or of the CONTRACT and which are stated to survive shall remain in full force and effect after such termination for any cause whatsoever.

Fax: + 31 20 570 7170**6. COVENANTS FOR PROVIDING OF GOODS****6.1 CONTRACTOR**

In consideration of the payment to be made by COMPANY to CONTRACTOR as set out in this CONTRACT, CONTRACTOR hereby covenants with COMPANY to deliver the **GOODS** in conformity in all respects with the provisions of this CONTRACT.

6.2 COMPANY

In consideration of CONTRACTOR's supply of the GOODS and all its obligations under this CONTRACT, COMPANY hereby covenants to pay CONTRACTOR the compensation at the time(s) and in the manner prescribed by the CONTRACT.

7. WARRANTIES AS TO LEGAL CAPACITY

Each of the PARTIES warrants to the other that:

- 7.1 It is a corporation duly organised and validly existing under the laws of the Country of its incorporation;
- 7.2 It has the legal right, capacity, full power and authority and all necessary permits, licenses etc., to carry on its business and to perform its obligations under the CONTRACT, to deliver and perform the CONTRACT and each matter contemplated by the CONTRACT or any document incorporated by reference into the CONTRACT;
- 7.3 The execution, delivery and supply by it of the CONTRACT and each matter contemplated by the CONTRACT, and any document incorporated by reference into the CONTRACT will not (with or without the lapse of time, the giving of notice or both) breach, contravene or conflict with:
 - 7.3.1 any law, permit, license etc., that it requires or has obtained in relation to any such matter;
 - 7.3.2 its constitution or constituent documents;
 - 7.3.3 any security arrangement, deed, contract, undertaking or other instrument or any encumbrance to which it is a party or which is binding on it, and does not and will not result in the creation or imposition of any security over any of its or their assets there under;
 - 7.3.4 Any of its obligations, including any statutory, contractual or fiduciary obligations.

8. SURVIVAL OF PROVISIONS

The provisions of this CONTRACT which by their nature survive final delivery of the **GOODS** or of the CONTRACT and which are stated to survive shall remain in full force and effect after such termination for any cause whatsoever.

ENVIRONMENT, SAFETY & HEALTH

ALJANOOB GROUP has achieved well-reputation through applications of good safety and HEALTH standards throughout all fields of works.

The company has well scheduled and condensed training courses for its staff and workers in all fields of safety and health, before, during and after completion of the projects.

For every project and work, there is a specific safety and health plan. There are always short daily lessons for the staff and workers in the site to discuss and explain the safety and health procedures of the work.

SHADIN is aware that any certain work will need to be undertaken in any conditions and locations, prior to commencing any work, SHADIN shall survey, study, analyze and interpret the safety factors thoroughly and check for any hazardous or dangerous factors that may occur with suggestion of suitable methods for treatment and processing. In addition, Al-SHADIN shall thoroughly control and follow-up all safety opportunities after commencing works.

Before starting any work; SHADIN shall administer a new employee project specific safety and health orientation. Manager shall be solely responsible to provide its own company specific orientation and specialized training to its employees. SHADIN shall provide all

supervisors with a supervisors safety and health orientation specific to their work on the project.

MEDICAL SUPPORT

SHADIN is fully aware of providing all work sites with first aid kit for the minor accidents. Workers will be trained to use this kit for treating accidents. All workers must know about the location of these kits in work site. The work site will be provided also with transportation mean for emergency cases, a vehicle will be used as an ambulance and driver has the direction for the nearest medical center to the work site.

SAFETY AND HEALTH ASSESSMENTS

SHADIN Management will take safety manners at the beginning of its plans, and take all the requirements, tools and equipments to be safe. SHADIN periodically have checking and inspection toward all workers, materials, equipments inside the site, and then documented the inspections by daily and weekly reports.

TOOLS AND EQUIPMENT

SHADIN is aware of continuous teaching of its workers to keep away from improperly using tools and equipment.

PERSONAL PROTECTIVE EQUIPMENT

The proper selection and use of Personal Protective Equipment (PPE) is an important element in preventing work-related injuries. However; PPE can provide us with a level of protection against injury and illness only when maintained and uses correctly. We should be aware of all the PPE requirements for our work site and assigned tasks and observe positions at all times. When PPE is specified for certain work assignments or locations, its use is mandatory.

1. Head Protection

Any person entering a work area where there is a risk of head injury must wear a hard hat 100% of the time .The hard hat must be specifically suited to the type of hazards present in the work area, (i.e. . falling or flying objects , impact hazards , electrical shock and/or burn hazards)

2. Eye and Face Protection

In the workplace, some of the most common injuries are those of the eye and face, resulting from flying practices, molten, metal, chemicals, gases, or radiant energy). Selection and using proper eye and face protection can prevent most of these injuries. Safety glasses shall be worn 100% of time the work.

3. Hand Protection

Gloves are made from various materials each providing protection from a specific type of hazard (sharp or abrasive objects, specific chemicals, electrical). No single glove offers protection from all chemicals.

Employees who handle chemicals or harmful substances shall be trained and shall wear appropriate personal protective equipment per the chemical manufacturer's recommendations. We supply and encourage the worker to wear gloves when handling any materials.

4. Hearing Protection

The hearing protection is important to eliminate exposure to excess noise. The worker near noisy work environment will wear one of these kinds and according to the situation of work such as: ear plugs, hearing protectors, ear muffs.

5. Foot Protection

Protective footwear offers you protection from falling objects, punctures, crushing, slipping and electrical shock. Employees must wear sturdy leather shoes or boots at all times in the work.

6. Fall Protection and Prevention

Fall protection requires that the worker be tied off 100% of the time and the harness to be worn at all times, fall protection only works when worker use it: "Tie off".

HOUSE KEEPING

Housekeeping is a fundamental and necessary activity and will be performed by every employee working on the project. Work areas, passageways, stairways, and all other areas will be kept free of debris, equipment, and materials. Appropriate trash containers will be placed strategically and used for disposal of scrap materials and other generated debris. Liquids (such as paints, solvents, thinners, oils, and greases) and any other material or containers which have contained chemicals will be labeled and disposed of in accordance with the hazardous waste procedures and regulatory requirements. Storage areas will be kept clean and materials neatly stacked or placed. Materials will be stored or placed in an orderly manner.

FIRE PREVENTION

SHADIN is highly aware and cares that the crew will have enough knowledge about preventing different kinds of fire and suitable material to extinguish them, including principal procedures and points:

- Procedure to prevent Fire through keeping site area clean and arranged, Using of suitable cleaning material while is safe, Putting flammable liquids and materials in approved labeled containers and finally, Control of sparks in working areas."
- Preparation of suitable material to fighting fire depending on MSDS data of materials supplied to the site such as using water to extinguish (wood or paper fire), and using powder extinguisher with CO₂ for fighting electrical and flammable liquids fires.

SAFETY is the number ONE in its importance coming for SHADIN in any work to be accomplished. It is leading toward better life and living when conjugated with Quality.

ENVIRONMENTAL POLICY

Environmental Policy prevention and protection service
SHADIN is preparing itself as regards the resources, the procedures and the services to be certified in accordance with Standards ISO 14001.

SHADIN has always been extremely sensitive to the problems relevant to the environment and for quite some time has introduced significant actions on five essential aspects:

- Working environment
- Production cycles
- Waste and scraps disposal
- Finished product
- Disposal of the finished product.

SHADIN pays particular attention to the safety problem, both manufacturing machines in accordance with the European directives and complying with the obligations prescribed by the Italian and European Legislation as regards the safety in the workplace.

Working environment

The company has invested to improve the working conditions of the personnel by means of:

- Summer and winter air conditioning system
- Use of aspirators for evacuation of smoke and dust
- Appropriate lighting to the different working typologies
- Internal computer network which allows the exchange of information in real time.

Production cycles

During the different phases of the production cycle SHADIN tries to reduce to the minimum the environmental impact by means of the following devices:

- Storage of the raw materials, separated for typologies, in suitable areas or rooms, adopting the principle of the minimum quantities necessary to the production cycle
- Use of high quality raw materials classified as non-injurious to health
- Use of operating machines, devices and working accessories in accordance with the directives on the noise pollution to reduce the minimum noise level inside the factory
- Suction system of smoke and dust produced in welding, carpentry and mechanical workings departments
- Advanced technology painting systems equipped with:
 - Suction and depuration stacks of vapour and dust residual of the painting
 - collecting systems of the water draining.

Waste and scraps disposal

The disposal is carried out according to the following steps:

- Identification of the waste
- Separate collection in suitable identified containers
- Chemical analysis for the waste which can be injurious by identification cards issued by authorized external bodies

- Filing the documentation
- Registration on proper registers, certified by the town registered office, of all the loading and unloading operations of the different waste typologies. The registers are kept for 5 years from the date of the last registration.

The waste disposal is carried out for typology only by specialized and authorized companies and subject to filling in of proper identification forms.

The forms are filled in four copies of which one is kept by the waste producer and another one is returned once the waste has been disposed by the receiver.

Finished product

An analysis of the product that after the utilization must be disposed is made since the first phases of the project.

The principle of the analysis of the product life cycle is adopted in relation to:

- Marketing
- Utilization
- recycling (where applicable)
- Reutilization and disposal

According to the typology of our product, the attention is pointed to the following aspects:

- emission of gaseous body in the atmosphere
- emission of noise
- emission of electromagnetic waves
- loss of pollutant fluids.

At the designing stage, a particular attention is given to the choice of the components in conformity with the European Directives and bought only from international suppliers of primary importance:

- endothermic motors already in accordance with the most restrictive directives in terms of gas and noise emissions
- electric motors already in accordance with the most restrictive directives in terms of electromagnetic waves and noise emissions

- hydraulic components with low emission of noise and arranged to the utilization of biodegradable fluids
- sound-proofing of the components which generate noise up to the re-entry in the parameters fixed by law and directives in force
- oils, greases, cooling liquids, liquids for braking systems of last generation and provided with toxicological cards.

Disposal of the finished product

For the disposal of the finished product, as prescribed by the European Machine Directive, please refer to the equipment use manual indicating the specific instructions on the matter.

QUALITY ASSURANCE & CONTROL

Quality Assurance standards becomes side by side with safety standards for SHADIN in order to reach the highest satisfaction by its clients and the maximum quality degrees.

Quality is of extreme interest to SHADIN as it is a main endeavor with safety toward a clean environment.

SHADIN is highly aware of implementing the highest grades of quality control throughout awareness given to all quality disciplines. Quality for SHADIN is a MUST. It is starting from the simple office tool to the largest machine and site equipment.

SHADIN team of quality managers and supervisors are of intensive knowledge toward continuous development of procedures and methods toward achieving highest levels of work.

Every project and, even being small or large, there is an accredited quality plan directed toward enhancing the quality of life.

SHADIN is aware to follow-up the design organization to establish and maintain procedures to control designs based on the contract Scope of Work to ensure specified requirements are met.

Design and Development Planning ensures that:

- ✓ Plans are prepared for each design activity or phase.
- ✓ Responsibility for implementing each phase, activity, or phase is properly defined
- ✓ Qualified personnel are assigned to the design and development process.
- ✓ Adequate resources are allocated to the product design and development process.

- ✓ Plans are updated, and circulated to the appropriate participants, as the design changes.

Groups involved in the design and development process are identified and the required information documented, transmitted and reviewed throughout the design process.

All design-input requirements are identified, documented, and reviewed for adequacy. Incomplete, ambiguous, or conflicting requirements are resolved with those responsible for imposing the requirements. The following are classified as design inputs:

- ✓ Customer expectations
- ✓ Contractual requirements
- ✓ Regulatory and Statutory Requirements
- ✓ Environmental and Safety considerations
- ✓ Performance Standards
- ✓ Specifications

On the other hand, design outputs are calculations, drawings, parts lists, specifications and may be used for purchasing, production, installation, testing, and servicing. Design outputs are expressed in terms that allow them to be compared with design input requirements.

At appropriate stages of design (detailed and final), design reviews are planned and performed and are formally documented and maintained as a quality record

- ✓ Ensure that representatives from all relevant area are involved in the design review process.

Designs (at appropriate stages) are verified using any combination of the following:

- ✓ Using alternative calculations to verify design outputs
- ✓ Comparing design outputs of new designs with proven designs
- ✓ Undertaking tests and demonstrations to verify design outputs

Design validation is performed to ensure the product conforms to defined user needs and requirements. Validation is normally performed on the final product under defined operating conditions; however, may be conducted in earlier stages prior to product completion. Design Changes and modifications are identified, documented, reviewed, and approved by authorized personnel before their implementation.

Document control resembles one of the important factors toward having organized and qualified works. It plays an important role in speeding-up the work.

The register of documents includes document number, revision, issue date (and/or effective date), and document title for all documents. All external documents are date stamped on receipt and entered in the Document Control Register with information similar to that for internal documents.

Also, the distribution of internal and external documents shall be complying with an internationally accredited Document Distribution Matrix.

Purchasing Status is another factor in the quality cycle. Suppliers and Subcontractors are selected based on their ability to meet technical, quality, schedule, testing, and resource requirements. Other factors include past performance for similar product, ability to accommodate change, price, etc. Procurement Document Review Record is used to document the review of bid and contract documents. The Procurement Document Review

Record is retained as a quality record. It is preferred to have a record of acceptable (qualified) suppliers and subcontractors have been established and maintained. Purchasing documents are reviewed and approved by the buyer for adequacy of specified requirements prior to their release.

SHADIN has a well-developed Product Identification and Traceability procedures based on the specific requirements of the Subcontract and the nature of the product. It imply selection of an appropriate method for identification and traceability of product, such as labeling, tagging, marking, color coding, bar coding, storage in designated racks, bins, etc.

Besides, testing and Inspection of material and equipment is another factor added with a higher level of importance to the quality cycle. It is important to perform receiving inspection and testing for material and equipment (if required), when product is received. In-process and final inspection and tests, as required, are performed and documented. Inspection & Test Reports are retained as a quality record.

SHADIN holds the responsibility toward training of employees based on their education, experience, and prior training. Once the needs are determined, appropriate training is provided and documented, and training records are maintained. Additional training, if required (e.g., Concrete Placements, Concrete Testing & Inspection) is provided and documented.

SHADIN is aware of developing its Quality system continuously through following-up and implementation of the latest updates methods and terms in all fields of life.
